

VACANCIES – NEW FACTORY REQUIRES KEY POSITIONS

GUYANA SUGAR CORPORATION INC.

The Guyana Sugar Corporation Inc. is currently constructing a new sugar factory and co-generation facility at its most easterly location, Skeldon. The new factory will be a state of the art raw sugar factory producing high quality VHP sugar. Annexed to this factory is a co-generation plant that is capable of generating 30MW of power from two steam turbines as well as 10MW from fossil fuel generators.

We are looking to recruit dynamic individuals for three key positions within the structure of the new facility, due for commissioning in February 2008:

The **Factory Manager, reporting to the General Manager, will have:**

- A minimum of 20 years experience in sugar processing with at least 5 years in the role of Factory Manager
- Knowledge and experience in co-generation, diffusion technology, continuous vacuum pans and modern DCS factory operations. Commissioning experience is a definite advantage
- Minimum educational qualification is a BSc Degree in Science or Engineering related subject

The **Co-Generation Manager, reporting to the Factory Manager, will have:**

- A minimum of 10 years experience in a power house environment, preferably a sugar environment, with co-generation knowledge
- Experience in the operation and maintenance of diesel power generating units of up to 5MW capacity using dual fuels (HFO/LFO)
- Experience in the operation and maintenance of steam turbine generators
- Knowledge in the operation and maintenance of high pressures boilers
- As the manager responsible for the operation of the Skeldon independent power production facility the applicant will be required to co-ordinate on a continuous basis the liaison with the GPL grid control office and optimize the energy efficiency of the Skeldon plant.
- Minimum educational qualification is a BSc Degree in Mechanical or Electrical Engineering related subject

The **Instrument Engineer, reporting to the Factory Manager, will have:**

- Experience in automated control systems, DCS operations, Siemens controllers
- Knowledge of the operation and maintenance of all types of instrument and control system in a continuous process plant, preferably a sugar environment
- BSc degree in Instrumentation or related subject

All jobs will require skills in training and developing teams and individuals
